*****Shawn Beerens attended T8 school in December to learn more about T8 Systems and Diagnostics. **Kyle Ellens and Luke Ellens attended Precision Land Management school in January. This school gave hands on training with the New Holland and Trimble Guidance systems. **Shawn Short and Luke Ellens went to Kinze Planter sales school in December 2011.***

24/7 SERVICE

Over the past few years, more & more of your farms have been growing and are in need of extended hours service. We understand that your business runs harder and faster and also runs more hours of the day. In this growing industry, we are committed to providing the highest quality service even after normal business hours. In order to provide 24/7 service, our entire dealership will need to be involved. Calls made to our dealership after hours will be picked up by an answering machine. The machine will provide you with a cell number to call for immediate after hours parts and service issues. Please be aware that an extra charge will apply for after hours service.

After Hours Parts Service: Flat Charge of \$30.00

After Hours Service: Minimum charge of \$100.00

Service Call Fee: \$100.00

Hourly Rate: \$80.00 per hour

Units Under Warranty: Service Call Fee of \$100.00 only

BE AWARE OF WHAT YOU'RE BUYING **NOT ALL ACIDS ARE THE SAME**

	<i>New Holland's Crop Saver</i>	<i>Hay Pro</i>	Compared to Crop Saver Hay Pro Is.....
MANUFACTURER	HARVEST TEC	CHEMORSE	distributed in a localized market
Propionic Acid	65%	68%	has not tested at this level in the lab-runs around 62%
Citric Acid	5%	none	going to cause loss of color in the hay without Citric Acid
Surfactant	T-DET DD5	none	drift is significantly worse
