

# BOUNDARY MAPPING SERVICE

Precision Solutions Division

## BOUNDARY MAPPING SERVICE INCLUDES:

- Consultation to determine field locations
- Mapping of field boundaries
- Clean-up of field names
- Furnishing of shape or ISOXML file of boundaries
- Transfer of boundaries into business system or into 1 machine

### ACCURACY

Pairing RTK Plus and our Bobcat utility vehicle, our Precision Solutions team can map boundary lines for you within an inch of accuracy. Utilizing this technology will bring innovation to the forefront of your operation.

### SIMPLICITY

Proper boundaries in your system will save time both while operating equipment and while analyzing your field agronomic data. Tracking data more accurately and integrating across all brands will allow you to make decisions more effectively and confidently.

### INNOVATION

Data that is mapped works well in the can and in the cloud. Information can easily be uploaded into digital data centers, allowing you to plug boundaries into any system used in your operation and seamlessly select correct boundaries when moving field to field.

## WHY CHOOSE US?

Our boundary mapping service is just one step your operation can take towards innovation. We want to be an integral part of your business, regardless of brand. We offer a diverse set of services to be your one call for any need. At Ellens Equipment we are your partners on the job.

**Service Cost**  
TBD

**MyPLM Connect**  
MyPLM Connect accounts are free to set up and have activations that allow you to expand functionality

**When to Map**  
Mapping is ideal in the fall, post harvest before tillage, and also in between crops
